PROFILE SUMMARY

Results-driven Data Analyst with hands-on experience in Python, SQL, Advanced Microsoft Excel (Pivot Tables, complex formulas, data analysis techniques), Power BI, and Tableau. Proven ability to perform ETL operations, build interactive dashboards, conduct exploratory data analysis, and translate complex data into meaningful, actionable business insights for stakeholders. Strong analytical and problem-solving skills with high attention to detail and the ability to manage multiple priorities. Skilled in predictive analytics, data cleaning, feature engineering, statistical analysis, and machine learning model development, with growing exposure to compliance, risk, and financial services analytics. Confident communicator experienced in stakeholder management, driving discussions, and presenting data-driven insights clearly.

TECHNICAL SKILLS

Languages & Query: Python, SQL (MySQL, PostgreSQL), HTML, CSS

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, PyTorch

BI & Analytics Tools: Power BI, DAX, Power Query, Tableau, Microsoft Excel (Advanced — Pivot Tables, complex formulas, data analysis techniques), MS Office Suite (Excel, PowerPoint, Word), Jupyter Notebook, VS Code

Cloud: AWS (Basic – S3, basics of data storage and retrieval)

Core Competencies: ETL, Data Wrangling, Exploratory Data Analysis (EDA), Feature Engineering, Statistical Analysis, Predictive Analytics, Business Intelligence, Dashboard Creation & Data Visualization, Machine Learning, Data Modeling, Database Management, Analytical & Problem-Solving Skills, Attention to Detail, Stakeholder Management & Reporting, Presenting Insights Confidently, Compliance / Risk / Financial Services Domain Awareness, Multi-Priority Management

EDUCATION

Master of Computer Applications (MCA) 2024 – 2026

Guru Jambheshwar University of Science & Technology, Hisar

B.Sc. (Hons.) Computer Science – Data Science 2021 – 2024

Guru Jambheshwar University of Science & Technology, Hisar

WORK EXPERIENCE

Data Analyst Intern Jun 2025 – Jul 2025

Techlens Global, Gurugram

- Built real-time Tableau dashboard (Live Stats Energy) tracking 8+ KPIs — Total Visitors, Leads, LTQ%, Payable Clicks & New Quotes — with hourly vs. 3-month average trend comparison across web servers.
- Developed Customer Churn Prediction model using Random Forest & XGBoost on IBM Telecom dataset (7K+ records); tuned via GridSearchCV and evaluated with ROC AUC, F1-score, Precision & Recall.
- Performed end-to-end EDA & preprocessing using Pandas and Advanced Excel — label encoding, StandardScaler normalization, pivot-table-based summaries, and SMOTE for class balancing on imbalanced telecom churn data.
- Deployed churn model as a Flask web application with real-time inference using serialized .pkl model, encoder, and scaler pipeline objects.
- Collaborated with cross-functional stakeholders to translate raw data into clear, actionable insights, presenting findings confidently in a production-grade Tableau Server environment (multi-node cluster, Linux CentOS 7.9, Tableau 2024.2) following a structured test-to-production deployment workflow.

PROJECTS

Customer Churn Prediction (Python, SQL, Scikit-learn)

- Built and evaluated 3 ML classification models (Logistic Regression, Random Forest, XGBoost) on a 10K-row telecom dataset achieving 87% accuracy.
- Performed full EDA and feature engineering to identify 8 key churn drivers, generating actionable retention insights for stakeholders.
- Reduced false-negative churn predictions by 15% through hyperparameter tuning — directly informing risk-aware retention strategy.

Live Stats Analysis Dashboard (Tableau)

- Designed a real-time Tableau dashboard tracking 8+ website metrics (sessions, bounce rate, CVR, DAU) refreshed every 15 minutes.
- Enabled data-driven insights through dynamic filtering and drill-down reporting, supporting stakeholder decision-making.

Music Store Data Analysis (SQL, PostgreSQL)

- Queried and analyzed a relational database using 15+ complex SQL joins, aggregations, and window functions.
- Identified top 5 sales trends and customer behavioral segments, contributing to a targeted marketing recommendation.

AI Powered QR Phishing Detection (Machine Learning, Python)

- Analyzed & engineered URL-based features using Python & Pandas, building an ML classification model for phishing/fraud-risk detection with explainable predictions (SHAP/XAI).
- Designed an interactive Streamlit dashboard to visualize risk categorization and model insights, translating ML outputs into actionable business intelligence.

HR Analytics Dashboard (Power BI, DAX)

- Designed an interactive Power BI dashboard tracking 10 workforce KPIs including attrition rate, headcount, and department performance, using Advanced Excel and DAX for data modeling.

CERTIFICATIONS

- Tableau Data Analyst / Specialist Desktop Certificate Prep – Udemy (2024)
- Data Analyst Bootcamp: Basics to Advanced – Udemy (2024)
- SQL – MySQL for Data Analytics and Business Intelligence – Udemy (2023)
- 4-Day Soft Skills Training Workshop – NIIT Foundations (2023)
- Trained Students in 2-Day Soft Skills Training Workshop – NIIT Foundations (2023)
